## ***Important Notice to all Residents and Businesses on the Town of St. Brieux Water Treatment Plant and Distribution System:***

*We are excited to provide you with an important update regarding the new Water Treatment Plant (WTP). The construction of the new facility is in its final stages, and we anticipate the completion of commissioning of the plant to be complete in the next 1-2 weeks. The new WTP will be producing reverse osmosis treated water. This advanced technology will result in high-quality water with minimal hardness, contaminants, or minerals.*

*As we transition from the old WTP to the new one in the next 1-2 weeks, there may be some temporary changes and fluctuations in the taste, odor, and color of your tap water. These changes are expected due to the change in the type of treatment and should gradually diminish as we stabilize operations in the new facility. The Town will be utilizing the potable water within the water storage reservoirs, which was produced using the old WTP, while we transition to the new WTP. The water provided will continue to meet all safety and regulatory requirements, and we will closely monitor the situation to promote a smooth transition.*

*We kindly request your understanding and patience during this period. Should you encounter any significant issues or concerns regarding your water quality, please contact the Town Office at 306-275-2257.*
