Note on Prohibited Weeds

Prohibited Weeds are either not currently in Saskatchewan, or are only recently introduced and very rare. If producers look through the list of *Prohibited Weeds*, there will be very few that they will recognize since for the most part, these species are not found in Saskatchewan yet. It is essential that these weeds are discovered as soon as possible after they enter the province, quarantined when they are found, and eradicated using the most effective means possible, to prevent them from gaining a foothold.
